UNIVERSITY OF WISCONSIN-MADISON
NORMS FOR THE MILLER ANALOGIES TEST

M. Kay Bennett

University of Wisconsin

The Counseling Center has been an authorized Controlled Testing Center (CTC) giving the Miller Analogies Test - Graduate Level Form for The Psychological Corporation since April, 1948. Various departments within the university have compiled norms from their own applicants. This CTC has compiled norms using small samples, but the following table presents the most comprehensive data thus far for the Miller Analogies Test at the University of Wisconsin.

The data do not include retakes of the test. Raw scores represent either the only score earned or the first score if the test was taken more than once. With the exception of approximately one-fourth of the sample, all scores are for Form M. The other one-fourth are for Form L. Form M replaced Form L in September, 1969, as the form given to individuals who previously had never taken the test. Forms M and L are comparable in difficulty ($r=.90$).

CTC records indicate student or nonstudent status only at the time of testing. Most of the U.W. students were college seniors. The sample of non-U.W. students may include some people who had previously been U.W. students. All of the examinees were tested in 1969 or 1970.

As additional students are tested, separate norms will be prepared for different fields of study based upon undergraduate major and/or proposed graduate major.
